## What is this product?

### TYPE

The product is a sub-fund of the Fund, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

### TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

### OBJECTIVES

The objective of the Sub-Fund is to maximize the return on the investment on the international equity markets.

The Sub-Fund may invest in all types of equities without any restrictions in terms of market capitalization, geographical zones and sectors. The allocation between all these international equities will reflect the micro and macro-economic analysis of the Investment Manager (Pure Capital S.A.).

The Sub-Fund's long-term strategy involves a careful curated portfolio, using a selection of typically (but not necessarily always) at least 25 large capitalisation predominantly North American and Western European equities exposure, typically (but not necessarily always) similarly weighted.

These selections are driven by a stringent blend of investment factors including size, quality, value, yield and volatility to deliver a diversified and performing stock-picking portfolio reinforced by solid track record and back testing. The portfolio is actively managed by periodically monitoring stock selection while applying momentum factors to favour outperforming stocks over time.

Under normal market circumstances, the Sub-Fund invests generally in equity securities of companies that have value characteristics. However, the Investment Manager may choose also to invest in companies that have more of a growth profile. The Sub-Fund will maintain a clear majority of at least 55% of the investments in OECD denominated currency securities.

The Investment Manager of the Sub-Fund may, under exceptional market circumstances and for the sole purpose of protecting the portfolio value, invest up to 100% of the net assets in high investment grade government debt and high investment grade corporate bonds denominated in any OECD currencies.

The Sub-Fund may hold cash on an ancillary basis up to 20% of its net assets. This limit can be temporarily breached for a period of time strictly necessary when, because of exceptionally unfavourable market conditions, circumstances so require and where such breach is justified having regard to the interests of the investors.

The Sub-Fund may invest up to 20% of its net assets in time deposits with credit institutions, which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 (twelve) months.

The Sub-Fund may invest in shares or units of UCITS or other UCIs such as Money Market UCITS or other UCIs for cash management purposes. The Sub-Fund may not invest more than 10% of its net assets in units of other UCITS or other UCIs. In the case of fund investments, the target fund(s) might have different investment strategies or restrictions.

The remaining assets may be invested, to the full extent and within the limits permitted by the 2010 Law, in all eligible assets as defined in the Prospectus.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

Investments may be redeemed on a daily frequency on request.

The Sub-Fund currency will be USD.

The Sub-Fund is actively managed and is not managed in reference to a benchmark.

This Class is accumulative. Dividend distributions are not planned.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

## What happens if PURE CAPITAL S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with CACEIS Bank, Luxembourg Branch and are segregated from the assets of other sub-funds of the PCFS. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level. Poor market conditions are unlikely to impact the Fund's capacity to pay you.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 617	EUR 1 964
Annual cost impact (*)	6.2%	3.0%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.2% before costs and 5.2% after costs.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Maximum 3.00% of the amount you pay in when entering this investment out of which 1% is returned to the Sub-Fund.	Maximum EUR 300
