

OBJECTIFS & POLITIQUE D'INVESTISSEMENT

The objective of the sub-fund is to maximise the return on an investment in the European equity markets. The investment policy incorporates the principle of increased risk diversification, an elaborate portfolio construction process and a high level of flexibility and responsiveness in investment decisions. Under normal market conditions, the sub-fund invests a majority of its net assets (at least 55%) in shares of companies having their registered office or generating a majority of their income in European countries. These stocks are carefully selected for their value characteristics. The focus is on generating free cash flows and balance sheet strength. The manager may also invest in a very selective and timely manner in companies with "growth" characteristics. The manager also has the flexibility to invest, but to a lesser extent, in shares of companies domiciled in or generating a majority of their income in Central and Eastern Europe such as Poland, Czech Republic, Hungary, Russia and the former USSR block countries and also in Mediterranean countries such as Turkey, Israel, Egypt and Morocco. The sub-fund is actively managed and not benchmarked. It is classified as Article 6 under SFDR regulation. The sub-fund does not consider principal adverse impacts on sustainability factors.

MAIN RISKS

Equity risk: equities fluctuate in value, sometimes due to factors unrelated to the value of the issuer of the securities. The price may then be affected by economic factors and market conditions such as a general decline in stock prices or conditions affecting certain issuers (such as changes in earnings expectations).

Exchange rate risk: this is the uncertainty of the exchange rate of one currency against another in the short to medium term.

Credit risk: an issuer may not be able to meet its obligations.

Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its obligations, particularly in the case of OTC derivatives.

Liquidity risk: the sub-fund may invest in markets which may be affected by a decline in liquidity. These market conditions may have an impact on the prices at which the manager buys and sells its positions.

The impact of the risks of financial techniques: the use of complex products such as derivative contracts may lead to an amplification of the movements of the securities of the sub-fund.

Discretionary management risk: there is a risk that the sub-fund may not be invested in the best performing securities at all times.

Operational risk: the risk of fault or error within the various actors involved in the management, valuation and/or custody of the sub-fund's assets.

Sustainability risk: Uncertain social or environmental event or condition that, if it occurs, can cause significant negative impact on the sub-fund's assets.

For more information on the risks, please refer to the prospectus of the UCITS
